

AMENDMENTS TO THE SPECIFICATION

Please add between the paragraph beginning on page 4 line 12 and line 13, with the following new paragraph.

--FIGURE 3a is a cross sectional view taken along lines 3a -3a of FIGURE 3. --

Please replace the paragraph beginning at page 7 line 12, with the following rewritten paragraph.

--Each panel 48 making up the walls and top is covered with a fabric bag 58 that envelopes the entire panel 48 and forms a ~~pad~~ shielded panel that is easily handled and provides external protection. The fabric bag 58 is made of a material such as woven fabric cloth, rip-stop nylon, thermoplastic film, canvas, reinforced polyethylene, vinyl coated nylon, polyurethane mesh or woven polyethylene. Each bag 58 is preferably sewn with stitching 60 and optionally may include a zipper 62 on one end for entry, or the stitching 60 may enclose the entire panel 48. It should also be noted that if thermoplastic is utilized as the covering, welding a seam is a viable alternative to sewing.--
